

# Type ESV

## Extruder sampling valve

- representative sample
- safe and simple operation
- FDA compliant

for free falling granulates  
and pastes  
Sampling volume: variable

PN — Class —  
Temperature: -40 bis 250°C  
Ventilation to atmosphere

### Design characteristics

- easy installation
- representative sample,
- installation position 90°
- material: stainless steel 1.4308,  
ASTM A341 CF8

### Options

- other materials
- other lab bottle adapter

## Functionality

To remove old media from the  
extruder turn counterclockwise.

After turning the handwheel  
clockwise to take a sample
